Index for The Computer Journal, Volume 30

1. Index of Titles of Papers, etc.

Accessing Textual Documents using Compressed Indexes of Arrays of Small Bloom Filters 343
Adaptive and Optimal Parallel Algorithms for Enumerating Permutations and Combinations 433
Algorithmic Transformation of Schemas to Structured Form, The 43
Alternative Prototyping Classification, An 481
Architecture for Associative Processing of Large Knowledge Bases (LKBs), An 404
Automatic Generation of Test Data, The 63
Automatic System for File Compression, An 80

Batched Interpolation Search 565
Buddy Algorithms 308

Chainmail: A Model of First-fit Memory Allocation 201
Colour Manipulation of Superposed Families of Curves 349
Combinator Reduction in a Shared-memory Multiprocessor 214
Compaction Techniques for Raster Scan Graphics using Space-filling Curves 87
Comparative Framework of Data Modelling Paradigms and Approaches, A 8
Connected Component Labelling using Quadtrees – A Bottom-up Approach 176
Convergence of an Iterative Scheme for Solving a Quadratic Equation, A Note on the 189
Crossword Compilation with Horn Clauses 183

DAP Prolog: A Set-oriented Approach to Prolog 393
Data Compression for a Source with Markov Characteristics 149
Data Compression Using Dynamic Markov Modelling 541
Deadlock Prevention in Process Control Computer Systems 20
Derivation of Sorting Algorithms from a Specification 512
Describing Software Design Methodologies 128
Design for an Efficient NOR-gate only, Binary-ripple with Carry-completion-detection logic, A 283
Displaying Random Surfaces 163

Efficient Implementation of Permutation Backtracking in Lexicographic Order, An 282
Efficient Structural Technique for Encoding 'Best-fit' Straight Lines, An 168
Evaluating Measures of Program Quality 228
Evaluation of Precompilation and Interpretation in Distributed Database Management Systems, An 519
Extension in the Definition of a Petri Net Execution, An 16

Fast-Carry Adder with CMOS Transmission Gates, A 77
Fast Algorithm for the Towers of Hanoi Problem, A 376
Flexible Synonym Interface with Application Examples in CAL and Help Environments, A 551
Formal Specification – A Comparison of Two Techniques 316
Functional Programming for Concurrent and Distributed Computing 437

General PASCAL Program for Map Overlay of Quadtrees and Related Problems, A 355

Hybrid Multiple Processor Garbage Collection Algorithm, A 119

Implementation of a Prototype for PRECI 157
Implementing Neural Network Models on Parallel Computers 413
Identification of Program Unstructuredness: A Formal Approach, The 507
Information-theoretic Complexity of Program Specifications 223
Information Protection Scheme Based upon Number Theory, An 249
Intelligent Retrieval and Presentation System for Management Information, An 485
Interval Routing 298

Knowledge-based Operating System, A 193

Lexicographic Listing and Ranking of *t*-ary Trees 569

Method for Speeding up Serial Processing in Dataflow Computers by Means of a Program Counter, A 289
Model for an ISAM File with Multiple Overflow Chains, A 529
Multiple Microprocessor System for CPU-bound Calculations, A 110

On a Novel Self-test Approach to Digital Testing 258
Optimising self-replicating programs 475
Optimising two-way Joins in Horizontally Partitioned Database Systems 458
Ordered Ports – a Language Concept for High-level Distributed Programming 487

Pedagogical Verification Condition Generator, A 239
Performance Analysis of the Generalised Disc Modulo Allocation Method for Multiple Key Hashing Files on Multi-disc Systems 535
Performance of Quicksort Adapted for Virtual Memory Use 362
Principles of the DelPhi Parallel Inference Machine 386
Programmed, Skeleton Formal Specification Method: The OUFDM, A 337
Programmer Experience-Level Indicators 52
Project 'Clear Skies': Teaching Computer Science by Computer Based Training and Electronic Messaging in China 469
Protein and nucleic acid sequence database searching: a suitable case for parallel processing 420

Ready-Trace Semantics for Concrete Process Algebra with the Priority Operator 498
Remote Capabilities 451
Role of Conceptual Modelling Abstractions in Compiler Development, The 328

Simple Algorithms for the Partial Singular Value Decomposition 268
Simple Method for Building up Large Computer Systems from Small Computers, A 295
Single Transferable Vote by Meek's Method 277
Some Transformations of Relevance to Report Generation 37
Stable Linear Time Sublinear Space Merging 372
Survey of System Complexity Metrics, A 233
System Design for the Remote Execution of Library Routines 254

Towards a Single Criterion for Identifying Program Unstructuredness 378
Towards a Tool Kit for the Systems Analyst 2
Towers of Hanoi: Derivation of Some Iterative Versions 70
Transputer Network for the Arbitrary Rotation of Digitised Images, A 425

Up and Down The Temporal Way 134

While-rule in Martin-Löf's Theory of Types, A 27
'Window' Terminal, The 558

3. Index of Topics, etc.

Access control matrix 249
Ada
  language 276
  fixed-point types 285
Adaptive coding for data compression 543
Adaptive parallel algorithms 433
Adder
  binary-ripple adder 283
  Kilburn parallel adder 77
Algebraic techniques for formal specification 316

Algorithms
'best fit' straight lines 168
best local similarity 410
Buddy 308
combination-generation 433
connected component labelling 176
control in distributed systems 304
digital testing 260
drawing space-filling curves 87
elastic net 417
encoding and decoding 569
garbage collection 119
generation and solution of crosswords 183
hidden line/surface 163
Hopfield net, training for 415
image restoration 417
image rotation 426
incremental encoding 84
listing of trees 570
map overlay 356
parallel execution in shared memory 216
partial singular value decomposition 268
permutation 282
quadratic equation 189
ranking of trees 571
single transferable vote 277
sorting 512
string matching 420
suffix stripping 556
synonym generation 551
Tower of Hanoi, iterative 70
Tower of Hanoi, fast 376
Attribute grammars 328
AUTOMARK 228
Axiomatic semantics 239

Backtracking in permutation algorithms 282
Batched
binary search 565
interpolation search 565
sequential search 565
Binary-relationship Model 11
Bi-simulation semantics 498
Bloom filters 343
Bubblesort 191, 515

SUBMISSION OF PAPERS

Papers for the Algorithms Supplement should be addressed to Professor L. M. Delves, Department of Statistics and Computational Mathematics, Victoria Building, Brownlow Hill, P.O. Box 147, Liverpool, L69 3BX, UK. All other communications should be sent to the Editor-in-Chief.

Opinions expressed in *The Computer Journal* are those of the authors and do not necessarily represent the views of The British Computer Society, the publisher or the organizations by which the authors are employed.

The Computer Journal is published on behalf of The British Computer Society by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022, USA.

Subscriptions: *The Computer Journal* (ISSN 0010-4620) is published six times a year, February, April, June, August, October and December. The annual subscription price for 1987 (which includes postage) is £122.00 in UK, US $275.00 in USA and Canada, £138.00 in rest of world. Single parts cost £24.00, US $47.00 in USA and Canada (plus postage). Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent, or to the Cambridge University Press at either of the addresses shown on this page. Copies of the journal for subscribers in USA and Canada are sent by air to New York to arrive with minimum delay. Second class postage paid at New York, NY and additional mailing offices. POSTMASTER: send address changes in USA and Canada to *The Computer Journal*, Cambridge University Press, 32 East 57th Street, New York, NY 10022, USA.

Advertising: For details contact The Advertising Manager, British Computer Society, 13 Mansfield Street, London W1M 0BP; Tel: 01 637 0471, or the American Branch of Cambridge University Press.

Members' Copies: Members of the BCS receive The Computer Journal at a greatly discounted rate. In the interest of the Society, members' copies should not be handed on to libraries.

© 1987 The British Computer Society.

Permission to copy for educational purposes only without fee all or part of this material is granted provided that the copies are not made or distributed for direct commercial advantage, the BCS copyright notice and the title of the publication and its date appear, and notice is given that copying is by permission of The British Computer Society. To copy otherwise, or to republish, requires specific permission and may require a fee.

For all other use, permission should be sought from the Cambridge University Press.

Copying: This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0010-4620/87 $5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Back Issues: Volumes 1–23 are available from Wm. Dawson & Son Ltd., Cannon House, Folkestone, Kent. For volume 24 onwards contact Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

Printed and bound in Great Britain by Cambridge University Press, The Printing House, Shaftesbury Road, Cambridge CB2 2BS.

Leslie Fox	Obituary, Dr J. H. Wilkinson, F.R.S.	1
D. Benyon and S. Skidmore	Towards a Tool Kit for the Systems Analyst	2
H. K. Klein and R. A. Hirschheim	A Comparative Framework of Data Modelling Paradigms and Approaches	8
R. H. Gallard	An Extension in the Definitions of a Petri Net Execution	16
S. Tsutsui and Y. Fujimoto	Deadlock Prevention in Process Control Computer Systems	20
R. Backhouse and A. Khamiss	A While-rule in Martin-Löf's Theory of Types	27
A. G. Middleton	Some Transformations of Relevance to Report Generation	37
G. Oulsnam	The Algorithmic Transformation of Schemas to Structured Form	43
J. A. W. Faidhi and S. K. Robinson	Programmer Experience-Level Indicators	52
D. C. Ince	The Automatic Generation of Test Data	63
J. S. Rohl	Towers of Hanoi: Derivation of Some Iterative Versions	70
P. M. Fenwick	A Fast-Carry Adder with CMOS Transmission Gates	77
T. Raita	An Automatic System for File Compression	80
A. J. Cole	Compaction Techniques for Raster Scan Graphics using Space-filling Curves	87
A. Verrijn-Stuart	Themes and Trends in Information Systems: TC8, 1975–1985	97
L. M. MacKenzie, A. M. MacLeod and D. J. Berry	A Multiple Microprocessor System for CPU-bound Calculations	110
I. A. Newman, R. P. Stallard and M. C. Woodward	A Hybrid Multiple Processor Garbage Collection Algorithm	119
I. Sommerville, R. Welland and S. Beer	Describing Software Design Methodologies	128
H. Barringer	Up and Down The Temporal Way	134
J. A. Llewellyn	Data Compression for a Source with Markov Characteristics	149
S. M. Deen, R. R. Amin and M. C. Taylor	Implementation of a Prototype for PRECI	157
S. Nedunuri and N. E. Wiseman	Displaying Random Surfaces	163
C. M. A. Castle and M. L. V. Pitteway	An Efficient Structural Technique for Encoding 'Best-fit' Straight Lines	168
A. Unnikrishnan, Y. V. Venkatesh and P. Shankar	Connected Component Labelling using Quadtrees – A Bottom-up Approach	176
H. Berghel	Crossword Compilation with Horn Clauses	183
M. J. Jamieson	A Note on the Convergence of an Iterative Scheme for Solving a Quadratic Equation	189
G. S. Blair, J. A. Mariani, J. R. Nicol and D. Shepherd	A Knowledge-based Operating System	193
C. M. Reeves	Chainmail: A Model of First-fit Memory Allocation	201
P. C. Burkimsher	Combinator Reduction in a Shared-memory Multiprocessor	214
N. S. Coulter, R. B. Cooper and M. K. Solomon	Information-theoretic Complexity of Program Specifications	223
K. A. Redish and W. F. Smyth	Evaluating Measures of Program Quality	228
J. K. Navlakha	A Survey of System Complexity Metrics	233
D. Gray	A Pedagogical Verification Condition Generator	239
C. C. Chang	An Information Protection Scheme Based upon Number Theory	249
B. Teufel	System Design for the Remote Execution of Library Routines	254
C.-L. Wey and F. Lombardi	On a Novel Self-test Approach to Digital Testing	258
J. C. Nash and S. Shlien	Simple Algorithms for the Partial Singular Value Decomposition	268
M. C. Er	An Efficient Implementation of Permutation Backtracking in Lexicographic Order	282
D. Salomon	A Design for an Efficient NOR-gate only, Binary-ripple with Carry-completion-detection logic	283
M. Sowa	A Method for Speeding up Serial Processing in Dataflow Computers by Means of a Program Counter	289
Cs. Kecskes	A Simple Method for Building up Large Computer Systems from Small Computers	295
J. Van Leeuwen and R. B. Tan	Interval Routing	298
D. J. Challab and J. D. Roberts	Buddy Algorithms	308
D. A. Duce and E. V. D. Fielding	Formal Specification – A Comparison of Two Techniques	316
Christina Sernadas and R. Carapuca	The Role of Conceptual Modelling Abstractions in Compiler Development	328
P. Leith	A Programmed, Skeleton Formal Specification Method: The OUFDM	337
J. K. Mullin	Accessing Textual Documents using Compressed Indexes of Arrays of Small Bloom Filters	343
P. A. Firby and D. J. Stone	Colour Manipulation of Superposed Families of Curves	349
F. W. Burton, V. J. Kollias and J. G. Kollias	A General PASCAL Program for Map Overlay of Quadtrees and Related Problems	355
A. I. Verkamo	Performance of Quicksort Adapted for Virtual Memory Use	362
S. Dvořák and B. Durian	Stable Linear Time Sublinear Space Merging	372
D. Gault and M. Clint	A Fast Algorithm for the Towers of Hanoi Problem	376
T. S. Tse	Towards a Single Criterion for Identifying Program Unstructuredness	378
W. F. Clocksin	Principles of the DelPhi Parallel Inference Machine	386
P. Kacsuk and A. Bale	DAP Prolog: A Set-oriented Approach to Prolog	393
D. McGregor, S. McInnes and M. Henning	An Architecture for Associative Processing of Large Knowledge Bases (LKBs)	404
B. M. Forrest, D. Roweth, N. Stroud, D. J. Wallace and G. V. Wilson	Implementing Neural Network Models on Parallel Computers	413
A. F. W. Coulson, J. F. Collins and A. Lyall	Protein and nucleic acid sequence database searching: a suitable case for parallel processing	420
H. R. Arabnia and M. A. Oliver	A Transputer Network for the Arbitrary Rotation of Digitised Images	425
S. G. Akl	Adaptive and Optimal Parallel Algorithms for Enumerating Permutations and Combinations	433
F. W. Burton	Functional Programming for Concurrent and Distributed Computing	437
J. M. Foster and I. F. Currie	Remote Capabilities	451
A. Segev	Optimising two-way Joins in Horizontally Partitioned Database Systems	458
D. Godfrey, G. Shikang, R. Hart, N. Koorland and S. Smit	Project 'Clear Skies': Teaching Computer Science by Computer Based Training and Electronic Messaging in China	469

H. Thimbleby	Optimising self-replicating programs	475
Pamela J. Mayhew and P. A. Dearnley	An Alternative Prototyping Classification	481
M. Ramshaw, A. P. Steward and D. Stoves	An Intelligent Retrieval and Presentation System for Management Information	485
Julie Basu, L. M. Patnaik and A. K. Goswami	Ordered Ports – a Language Concept for High-level Distributed Programming	487
J. C. M. Baeten, J. A. Bergstra and J. W. Klop	Ready-Trace Semantics for Concrete Process Algebra with the Priority Operator	498
T. H. Tse	The Identification of Program Unstructuredness: A Formal Approach	507
R. G. Dromey	Derivation of Sorting Algorithms from a Specification	512
Elisa Bertino	An Evaluation of Precompilation and Interpretation in Distributed Database Management Systems	519
Y. Manolopoulos, D. Kleftouris and L. Petrou	A Model for an ISAM File with Multiple Overflow Chains	529
C. C. Chang and C. Y. Chen	Performance Analysis of the Generalised Disc Modulo Allocation Method for Multiple Key Hashing Files on Multi-disc Systems	535
G. V. Cormack and R. N. S. Horspool	Data Compression Using Dynamic Markov Modelling	541
G. M. Gwei and E. Foxley	A Flexible Synonym Interface with Application Examples in CAL and Help Environments	551
J. Parker, A. Kennard and D. King	The 'Window' Terminal	558
Y. P. Manolopoulos, J. (Y.) G. Kollias and F. Warren Burton	Batched Interpolation Search	565
M. C. Er	Lexicographic Listing and Ranking of t-ary Trees	569
